

WORKTALES

Website Restructure Scope of Work

Prepared for: Worktales (Alhasan Khalife)

Prepared by: Karim Khalifeh

Aligning worktales.com with the updated company profile and expanded service offering.

Project Overview

The current Worktales website positions the company primarily as a recruitment agency focused on connecting Lebanese talent with international organizations. The updated company profile tells a broader story: Worktales as an integrated workforce consultancy operating across three pillars — hiring, capability development, and culture/leadership alignment.

This project restructures the website to reflect that expanded positioning. The visual identity (dark theme, orange accents, typography) remains unchanged. The work focuses on information architecture, navigation, page structure, and content placement.

What Stays the Same

- Brand identity, color scheme, and overall visual style
- Contact form on every page (current pattern continues)
- For Talent page (minimal changes)
- Insights page structure (content updates provided by client)
- Integration with RecruitCRM (scheduling links, job board, talent pool)

What Changes

- Navigation structure and labeling
- Homepage layout and content hierarchy
- About page content and framing
- Two entirely new service pages
- Updated footer and contact form subject options across all pages

Page Summary

Page	Status	Work Type
Homepage	Major Rework	Restructure + new sections
Navigation	Major Rework	New structure + dropdown
Talent Solutions	Major Rework	Rename + expand from current homepage content
Training & Development	New Page	Build from company profile
Culture & Leadership	New Page	Build from company profile
About	Moderate Update	Content realignment
Insights	Minor Update	Structure stays, content swapped by client

For Talent	Minor Update	Stays under Services, minor alignment
------------	--------------	---------------------------------------

Detailed Changes by Section

1. Navigation

The current navigation frames Worktales as a recruitment company. The restructured nav introduces a Services parent with sub-pages covering all three pillars, plus the talent-facing page.

Current State	Proposed Change
About Us Insights For Talent	Services (dropdown) About Insights
No services dropdown	Services dropdown: Talent Solutions, Training & Development, Culture & Leadership, For Talent
No clear entry point to training or culture services	Each service pillar accessible in one click from any page

The Services dropdown items use descriptive labels rather than the internal Hire/Build/Connect terminology. The three-pillar branding (01 Hire, 02 Build, 03 Connect) can appear on the pages themselves once the visitor is reading.

2. Homepage

The homepage currently dedicates most of its space to the Hire pillar and a large “Why Lebanon” section. The restructured homepage introduces all three pillars with equal weight and adds the outcomes section from the company profile.

Hero Section

Current State	Proposed Change
“Your Next Chapter Starts Here” with two CTAs (hire / job)	Updated headline and subtext reflecting the broader positioning. Three CTAs: one for hiring, one for training/development inquiries, one for talent.
Framing is recruitment-only	Framing reflects all three pillars: people decisions as the core challenge

The hero should draw from the company profile’s framing: the real risk in business is not strategy, it is people decisions. This positions Worktales as more than recruiters from the first scroll.

Services Overview (replaces “The Worktales Way”)

Current State	Proposed Change
“The Worktales Way” section covers only Hire services (Strategic Talent Search, Remote Talent Hubs, Talent Enablement)	Three-pillar overview with equal visual weight. Each pillar gets a card/block with: pillar number + name, descriptive subtitle, 2-3 line summary, link to dedicated page.

Accordion/numbered list format	Card-based or column layout showing all three at once
--------------------------------	---

Pillar structure:

- Talent Solutions — Precision hiring, dedicated teams, and employer-of-record services
- Training & Development — Tailored programs for sales, leadership, AI readiness, and communication
- Culture & Leadership — Team effectiveness, leadership alignment, and Insights Discovery

Outcomes Section (new)

Add the metrics from the company profile as a prominent band between the services overview and the rest of the page:

- 90% client satisfaction
- 65% reduction in hiring cost
- 92% retention at 12 months
- Talent ready to onboard in under 2 weeks

“Why Lebanon” Section

Current State	Proposed Change
Large section with map, 4 cards, takes up significant homepage space	Reduce to a smaller band or move to About page. Keep the 4 value props but in a more compact layout.

This section is relevant for the Talent Solutions and EOR use case but not for training or culture clients. It should not dominate the homepage when two-thirds of the service offering has nothing to do with Lebanese talent arbitrage.

3. Talent Solutions Page

This page consolidates the Hire pillar content that currently lives on the homepage, plus the differentiators from the company profile that are currently missing from the website entirely.

Page structure:

- Pillar intro: Effective hiring begins with understanding how an organization operates (from profile page 5)
- Three service blocks (Executive Search, Talent Hubs, Talent Enablement) with descriptions and key features — move from homepage
- “Why Hire with Worktales” section with differentiators: Industry Expertise, Strategic Talent Pipelines, Modern Talent Sourcing, Connected Talent Ecosystem, 0% Retainer / 90-Day Replacement guarantee
- CTA to schedule a call (existing RecruitCRM link)

Key content currently missing from website: The 0% retainer / 90-day replacement policy is a strong sales differentiator that appears nowhere on the current site. The “Why Hire” section from the profile (page 6) is entirely absent.

4. Training & Development Page (New)

Entirely new page covering the Build pillar. All content sourced from company profile pages 7-8.

Page structure:

- Pillar intro: Industries are evolving faster than traditional skills frameworks
- Program areas displayed as cards or grid: Sales Performance & Commercial Effectiveness, AI/Technology & Future Skills, Organizational Performance & Execution, Communication/Public Speaking & Influence, Human Skills in an AI-Driven Workplace
- “Why Train with Worktales” section: Proven Experience, Global Partnerships, Program Formats (workshops/certificates/diplomas), Accreditation, Ready to Mobilize
- CTA to request program brochures or schedule a consultation

Note: Client to provide specific program details, partner names, and accreditation logos. Developer builds the page structure and layout; client fills in specifics.

5. Culture & Leadership Page (New)

Entirely new page covering the Connect pillar. Content sourced from company profile pages 9-11.

Page structure:

- Pillar intro: Organizations do not succeed through talent alone. Culture is not accidental — high-performing organizations build it deliberately.
- Four service blocks: Team Building & Effectiveness, Leadership Effectiveness, Change Effectiveness, Sales Effectiveness — each with a short description from the profile
- Insights Discovery section: What it is, the four-color model, how it works (questionnaire → profile → workshop → application). Include Insights Partner badge/logo.
- “Why Connect with Worktales” section: Engaging Sessions, Insights Discovery Partnership, Strategy-Driven Culture Work, Communication Excellence, Connection Formats
- CTA to request program brochures or book a session

Note: The Insights Discovery section could be a standalone sub-section or its own scrollable area on this page given the level of detail in the profile. Client to confirm whether they want it as a separate page.

6. About Page

The About page needs content realignment rather than structural overhaul.

Current State	Proposed Change
Leadership message: “AlHasan Khalife, Managing Partner”	Update to: “Alhasan Khalife, Managing Partner, ICF-Accredited Coach” with ACC badge
Brand principles section (generic)	Add or replace with the problem statement from profile page 3: Unstable / Underpowered / Misaligned framework

FAQ mixes client and candidate questions	Split into two sections (For Organizations / For Talent) or move candidate FAQs to the For Talent page
Address: Georges Katroux Street, Badaro	Update to match profile: Khanamerian Bldg 5th Floor, Badaro (confirm with client which is correct)

7. Insights Page

Structure remains the same. Current articles are all candidate-facing (CV writing, LinkedIn optimization). Client should add organizational/leadership content to reflect expertise across all three pillars. No structural dev work required beyond what the current article template supports.

Recommendation to client: Add articles on topics like AI readiness for teams, cost of bad hires, building remote team culture, leadership development ROI. This positions Worktales as thought leaders beyond recruitment.

8. For Talent Page

Minimal changes. Page moves under the Services dropdown in the nav. Content stays largely the same. Update contact info if address changes.

9. Footer & Contact Form (All Pages)

Current State	Proposed Change
Contact form subjects: Talent hiring inquiry, Remote team setup, Employment and compliance, Partnership opportunity, Talent community registration, Other	Add: Training & development inquiry, Culture & leadership consulting, Insights Discovery inquiry
Address inconsistency between pages possible	Standardize address across all pages to match confirmed location
